Luis Marquina Rodríguez

Full-Stack Software Engineer · Applied AI

lmrodriguez2017@gmail.com | Madrid, Spain
luis.inmovira.com | linkedin.com/in/luismarrod | github.com/Luiiss44

PROFILE

Full-stack software engineer in the final year of a BSc in Software Engineering (Data Engineering track) and co-founder of two AI-powered SaaS products piloting with early customers. I design and build complete systems —Rust and TypeScript backends, React, Next.js and Astro front-ends, PostgreSQL and cloud deployment— with a focus on security, data privacy and applied AI. Additional training at 42 Madrid.

EXPERIENCE

Zeonida · **Co-founder & Software Engineer** — Oct 2026 – Present

LegalTech · AI · zeonida.com

- Version 1.0.0 (October 2026), piloting with the first law firms, of a stateless AI assistant for Spanish court representatives and lawyers: **Rust** backend (Axum, Tokio, sqlx, PostgreSQL + pgvector) and **React 19 + TypeScript** web app.
- Pseudonymisation enforced by the type system (the AI only receives pseudonymised text), **WebAssembly** core for an in-browser private mode, NER with XLM-RoBERTa on **ONNX Runtime** and OCR.
- Procedural deadline engine with each judicial district's holidays; continuous deployment on Docker and Cloudflare with Sentry. Earlier MVP in FastAPI + Next.js with 2FA and AES-256-GCM.

Inmovira · **Co-founder & Full-Stack Engineer** — Jul 2026 – Present

Real estate SaaS · AI · inmovira.com

- Piloting with agencies. Crawler that monitors several real estate portals every hour through per-country proxies, plus a two-stage AI pipeline that verifies private sellers.
- Multi-tenant CRM with per-agency isolation, real-time WhatsApp alerts (Gemini) and price history per property.
- **Express 5 + TypeScript** API (Zod, rotating JWT refresh tokens, CSP), **Astro + Tailwind** website and self-managed Linux VPS deployment.

OTHER PROJECTS

- **Skyline Logistics** (Java) — layered logistics simulation with the Singleton, DAO and Strategy patterns.
- **MovieApp** (Kotlin · Android) — MVVM app with the TMDB REST API and Firebase persistence.
- **42 Madrid** (C) — libft, push_swap and ft_printf: algorithms and data structures from scratch.

EDUCATION

U-tad (University Centre of Technology and Digital Art) — Madrid, 2021 – 2027

BSc in Software Engineering · Data Engineering track · Final year

Data pipelines, AI, computer vision, recommender systems and IoT.

42 Madrid (Telefónica Foundation) — Madrid, 2023 – 2025

Intensive programming training · peer-to-peer methodology

TECHNICAL SKILLS

Languages	Rust · TypeScript · Python · JavaScript · Java · Kotlin · C · SQL · R · Bash
Frontend	React · Next.js · Astro · TanStack · Tailwind CSS · HTML5 · GSAP
Backend	Axum · FastAPI · Node.js · Express · REST / OpenAPI · JWT · WebSockets
Data / AI	PostgreSQL · pgvector · ONNX Runtime · LLMs · Pandas · NumPy · TensorFlow · Spark
Databases	PostgreSQL · MongoDB · MySQL / MariaDB · Turso (libSQL) · Firebase · Oracle
DevOps	Docker · GitHub Actions · Cloudflare · Linux / VPS · Sentry · Vercel · Git

LANGUAGES

Spanish	Native
English	B2 – Upper intermediate

AVAILABILITY & INTERESTS

Availability	Immediate start.
Interests	Applied AI, LLMs and transformers, data privacy, automation.
Soft skills	Autonomy, product mindset, teamwork and continuous learning.
